CAREER OBJECTIVE

Motivated Computer Science and Engineering student specializing in AI & ML with strong foundational skills in Python, web development, and backend frameworks. Seeking a software development internship to apply hands-on skills in building dynamic web applications and contribute effectively to team deliverables while expanding technical capabilities.

EDUCATION

NSRIT College 2025 – 2029 (Expected)
Bachelor of Technology (B.Tech) - Computer Science & Engineering (AI & ML) **CGPA: 8.46 / 10**

TECHNICAL SKILLS

Programming Languages:	Python, C
Web Technologies:	HTML, CSS, js
Backend Framework:	Flask
Database:	SQLite
Development Tools:	Git, GitHub, Visual Studio Code

PROJECTS

Online Quiz System Live Project ↗ :- https://quizapp-3-ibei.onrender.com

Tech Stack: Python, Flask, SQLite, HTML, CSS, JavaScript

- Developed a web-based quiz application using Flask and SQLite for managing quiz logic and persistent records.
- Implemented user authentication and dynamic question rendering for interactive assessments.
- Created a clean, responsive user interface to ensure optimal user experience across device types.

VK IT Solutions Management Website Live Project ↗ :- https://vk-it-solutions-dhi1.onrender.com

Tech Stack: Python, Flask, SQLite, HTML, CSS, JavaScript

- Engineered an enterprise management web platform tailored for VK IT Solutions using Flask and SQLite.
- Designed and implemented role-based access control (RBAC) supporting Owner, Manager, and Employee tiers.
- Built integrated modules for employee tracking, attendance logging, leave processing, and automated salary calculations.
